Description:

The Club 3D HDMI™ 2.0 Hybrid Active Optical Cable features both copper and fiber conductors, providing a lighter, more flexible cable construction, which makes it ideal for installation in narrow spaces and over longer distances. The perfect solution for conference rooms, classrooms, digital signage displays, and more.

This CAC-1391 features a built-in booster circuit that is self-powered through the HDMI ports, allowing you to connect your HDMI-enabled devices at a distance of up to 30 meters with no signal loss.

The cable is Halogen Free, and produced according to the International Electrochemical Commission's Restriction Use of Halogen (IEC 61249-2-21) directive. This cable features unidirectional architecture, which requires that the cable is installed in the correct direction. Please refer to the "source" and "display" labels on the HDMI connectors, in order to ensure that the cable is connected properly.

Features:
