

Mobile notebook stand

Ergo-Q 330

- Turns your notebook into an ergonomic workstation anywhere you go
- Positions notebook screen at an ergonomic level for reduced neck torque and increased comfort
- Money saver: no need for an external monitor, and saves desk space
- Built-in (patented) document holder, pivotable for easy laptop set-up
- Open design ensures ventilation, prevents heat built-up
- Ultra mobile; light weight and completely foldable

More and more desktop computers are being replaced by laptop computers. However practical the laptop PC may be, it is, from an ergonomic point of view, not desirable to use it for extended periods of time. Due to the low positioning of the laptop screen and the fixated keyboard, most laptop users maintain a hunched-over body posture while working. Intensive laptop use can therefore cause serious musculoskeletal pain and injuries.

The Ergo-Q 330 provides the perfect solution! The Ergo-Q 330 allows the LCD computer screen to be adjusted to the users correct viewing height and depth, encouraging both a comfortable and safe posture. The Ergo-Q 330 also includes a document holder, which conveniently positions documents just below the laptop screen to minimize undue head and neck motion. In combination with a separate keyboard and mouse you can easily create an ergonomic workstation anywhere you go. Use the Ergo-Q 330 at home, at the office or while traveling on business. It's the perfect ergonomic solution wherever you choose to work!

Ergo-Q 330

Legal requirements for laptop computing

By European legislation, employers are obliged to take proper measurements to prevent physical discomforts among their employees. Separate from the screen the keyboard needs to be both tiltable and freely movable to allow a comfortable working position avoiding fatigue in the arms and hands. In addition one must be able to increase the height of the screen by placing a support underneath the monitor. The document holder requires to be stable, adjustable, and positioned so as to minimize uncomfortable head and eye movements. These guidelines do not only apply to desktop computers but also to laptop computer stations. Hence without additional precautions intensive laptop use is prohibited. In some European countries, e.g. the Netherlands, laptop use for a period of more than two hours per day is forbidden. Using the Ergo-Q 330 together with an external keyboard complies with legal workplace requirements by which laptop use is no longer restricted to two hours per day.

* Scientific research

Studies in Sweden and the Netherlands have shown that working with the Ergo-Q results in: 17% increased productivity, 21% increased comfort, 32% decreased neck torque.

Six possible height settings for optimal viewing angle

Integral document holder, pivotable for easy laptop set-up

Open design ensures ventilation, prevents heat built-up

Ultra compact and light weight design

Security device for Ergo-Q 330

Material

ABS

Rubber anti-slip feet; aluminum rod

Dimensions

folded (wxdxh): 228 x 310 x 13 mm

in use (wxdxh): 228 x 310 x (113-193) mm

angle document holder: 20° - 40° (6 angles)

Weight

485 g
