- Easy tilt of screen helps to reduce glare
- 5 year warranty, rugged construction

Ergotron® LX

Large Display Cart

Transform any room into a conference room

The LX Large Display cart is the first plasma cart in the world that positions your large display anywhere, at any height, under any angle, with no effort.

The LX cart is the most flexible way to use your large screen where you need it. Save money by reducing the investment in large displays by sharing your large screen over multiple rooms. The high performance casters move your large display effortlessly in every environment changing any room into a conference room or even an entertainment area.

The unique 51 cm height adjustment feature ensures it can be used as a video-conferencing or a smartboard display, a presentation display or simply as a TV screen. Ergotron's patented CFTM technology makes it so easy to adjust the height of the display that you even may forget how heavy your large screen actually is.

- Save money by sharing your large display over multiple rooms
- Conveniently enables you to bring your display to the audience
- Easy height adjustment with just one hand thanks to CFTM technology
- Versatile usage - can be used in any situation: video-conferencing, presentation display, smartboard display, public information display, etc
- No professional installation required
- Smart counter balancing technology eliminates need for knobs and levers

Patented CF lift-and-pivot motion technology produces smooth lift and tilt adjustment—allows extremely low user-force to move display.

51 cm (20") height range for positioning display from 100-150 cm (39.25-59.25") from the floor.

No knobs or levers are used to activate the tilt motion or hold the position of display!

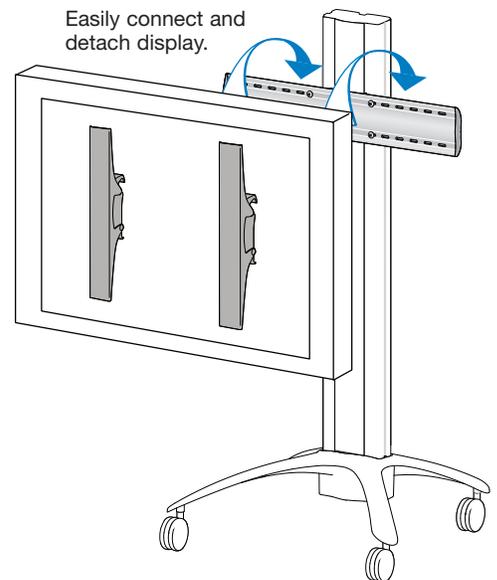

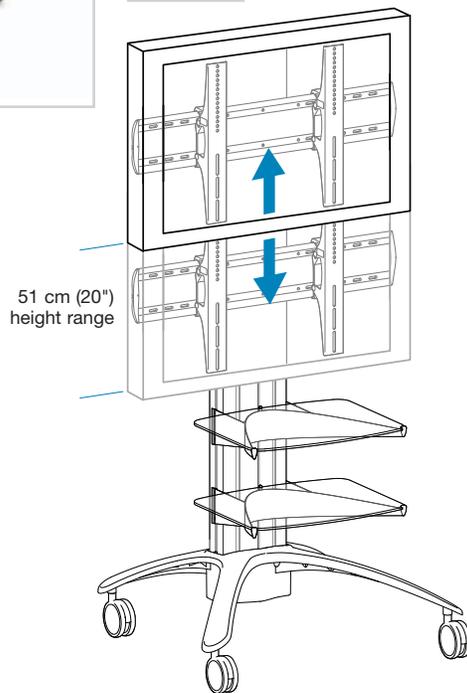

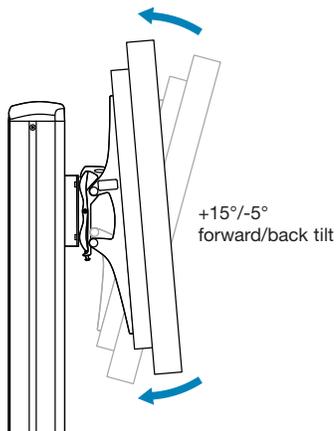

Two adjustable, removable glass shelves.

10 cm (4") locking casters and glides included for versatile set-up options.

Easy installation: attach two mounting brackets to back of large display.

Range of Motion
